Item number/s:

6400031

Machine for loosening of artificial turf. Working width 600 mm.

TurfPickup TP600 can loosen hardened artificial turf pitches with sand and/or rubber granulate infill. The manoeuvrable TP600 is ideal especially for small facilities e.g. tennis courts or repair areas in larger facilities. A rotating tine shaft loosens hardenings carefully and work out the infill material from the artificial turf.

The working depth can be adjusted via spindles. The 1-cylinder petrol engine provides sufficient power to work very effectively with a width of 600 mm. The weight of 75 kg and a fold-away handle make it easy and extremely handy to transport the TP600.
