

passion for sports grounds

The revolution in artificial turf care – the TurfTuner TT2000 from SMG.

For gentle and efficient artificial turf care, SMG presents a groundbreaking tow-behind device for loosening and brushing of artificial turf.

As a pioneer in the development of care solutions for sports facilities, SMG is bringing the TurfTuner TT2000 to the market, a solution that sets new standards in the care of artificial turf pitches. The TT2000 uses some of the most innovative technologies, based on more than almost 50 years of experience. Individual requirements and maintenance steps can be covered by optional accessories depending on customer requirements.

Technological innovations for optimal care:

- Unique three-point hitch and drawbar in one, for safe and easy transport.
- SMG-OMEGA system: drag broom and spring tines in a quick-change system.
- Adjusting spindles with lock and scale for precise adjustment of the working depth.
- 6 rows of spring tines, the working depth can be precisely adjusted for gentle and efficient loosening of the bedding material.
- Optional: additional rows of brushes available for a working width of up to 3 m, with a passage width of only 90 cm.
- Series of brushes with plastic bodies, more stable and durable than standard series of brushes with wooden bodies.
- 4 low-maintenance, solid rubber wheels that can be swiveled through 360° for minimal surface pressure.
- Operation possible with all commercially available municipal tractors, lawn tractors, golf carts, quads, etc.

The solution for perfect artificial turf in detail
