The RenoMatic Series from SMG: Your exceptional Solution for removing Infill Material from Artificial Turf.

The RenoMatic series – unbeatable when it comes to removing infill material from artificial turf. Experience unmatched performance and efficiency with the RenoMatic RM1500 and RM1502.

Unprecedented Performance with Soft and Hard Brush Combination

The RenoMatic series features a coordinated combination of soft and hard brushes, delivering a powerful impact on artificial turf. This innovative design leads to significantly increased work performance compared to conventional brush rollers, ensuring superior results with every use.

Pit Stop in Seconds with SMG-Omega Technology

With SMG-Omega technology integrated into the "brush revolver," changing brushes is a breeze. Experience pit stops in seconds, ensuring minimal downtime and maximum productivity during turf maintenance operations.

Minimal Surface Pressure for Optimal Results

The RenoMatic series is equipped with wide turf tires, ensuring minimal surface pressure when working on artificial turf. This coordinated design minimizes the risk of surface damage while maximizing the effectiveness of turf maintenance tasks.

Precision Adjustment for Tailored Results

Two adjustment spindles with scales allow for precise adjustment of the working depth. Whether removing the top layer of backfill material or replacing infill material, the RenoMatic series ensures step-by-step precision for optimal results every time.

Safety and Cleanliness Guaranteed

The closed conveyor pipe of the RM1500 and the vertical conveyor of the RM1502 ensure controlled extraction of the infill material into BigBags. This innovative technology prevents the discharge of microplastics, ensuring safety and cleanliness during turf maintenance operations.
